EXPLOSION PROOF ELECTRIC UTILITY VEHICLE

TOP PERFORMANCE

HEAVY DUTY MECHANICS

ROBUSTNESS: DESIGN TO LAST

MANY CERTIFICATIONS AVAILABLE

BATTERY AUTONOMY UP TO 100 km

WORKING DAYS EXCEEDING 8 HOURS

LOAD CAPACITY UP TO 1,205 KG

TOWING CAPACITY UP TO 4,500 KG

CAN HANDLE SLOPES UP TO 25%

2 - 4 SEATS CAB

ALKE' EXPLOSION PROOF ELECTRIC VEHICLES

The **ALKE' ATX EX** are designed to avoid any ignition risk in the surrounding atmosphere during their normal use and are built using special, certified components. Design, prototyping and manufacturing of all Alke' explosion-proof vehicles are carried out entirely in Italy, using the best of European and North American components in order to guarantee top quality and safety standards.

The **ALKE' ATX EX** Electric Utility Vehicles were developed to work in the hardest, most demanding conditions in chemical and petrochemical industries, production sites of mineral oil and natural gas, mining, tunnel construction and maintenance and many other sectors. They can be used for logistics, maintenance, first aid, firefighting, surveillance services, units with mobile cranes, etc.

DEALING WITH POTENTIALLY HAZARDOUS ENVIRONMENTS

ATXEX RANGE

SOLUTIONS FOR EXPLOSION PROOF NEEDS

Find out among our configurations the best solution for your needs!

We can develop special configurations upon request for specific applications or sectors like underground (ATEX M2) or environments where explosive materials are present (e.g. ammunitions and firework products - IP 4X and IP 5X).

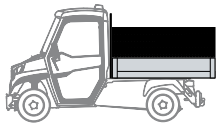
All the configurations presented are available for the vehicles with:

- 2-seat cab
- 4-seat cab
- left-hand drive

DR1

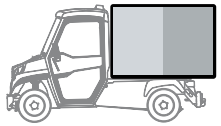
Dropside body

ME1



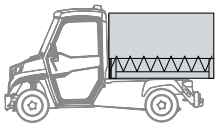
Dropside body with mesh sides extension

BV1



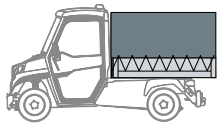
Box van body with sliding doors

TA1



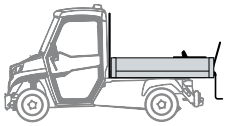
Tarpaulin body openable on three sides

TA2



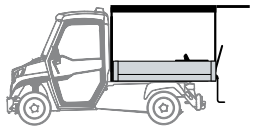
Tarpaulin body with customised colours

RS1



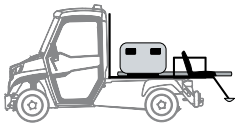
Rear seats kit

RS2



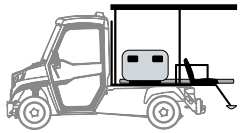
Rear seats kit with roof

AM1



Ambulance body

AM2



Ambulance body with roof

FL1

Flatbed

ATXEX RANGE

READY FOR THE MOST DEMANDING CONDITIONS

ALKE' electric utility vehicles are used daily by the most significant names in industry, in more than 40 countries across the globe.

ALKE' ATX EX have been operating for years in critical areas such as the frozen lands of northern Europe or the extreme temperatures of the Sahara, or other remote locations in the Far East and Africa.

EXPLOSION PROOF APPLICATIONS

oil plants
offshore extraction platforms
natural gas plants
chemical plants
petrochemical industries
tunnels
mines
among others

ATXEX RANGE

FIND OUT MORE ABOUT THE **ALKE' ATX EX** MODELS

HIGH AUTONOMY
Battery autonomy up to 100 km and energy recovery motor brake

COMFORT IN THE CAB
Air-conditioning system (work up to 55°C) and electric heating system, both explosion-proof certifiied.

ATX 340EX

KG max. capacity **1.205 kg**
max. towing capacity **4.500 kg**

2 SEAT CAB

max. autonomy **100 km**

cargo area **180x125 cm**

ATX 340EDX

KG max. capacity **1.085kg**
max. towing capacity **4.000 kg**

4 SEAT CAB

max. autonomy **95 km**

cargo area **180x125 cm**

VEHICLE'S COMPONENTS FOR APPLICATIONS ON POTENTIALLY HARZADOUS ENVIRONMENTS

ALKE' explosion proof versions have a specific design and safety expedients concerning the electrical system (batteries, connectors, sensors, control unit, etc.) and non-electric parts that could generate high temperatures or sparks (mechanical parts, brakes, plastic elements, etc.).

TEMPERATURE MONITORING SYSTEM

In order to avoid risk of overheating, the surface temperature is checked by a specific sensors, according to the class and limit of the temperature requested as standard. If this occurs, the vehicle will automatically shutdown, lighting the related indicator.

An earth leakage check system (versions for Zones 1 and 21) automatically shuts the vehicle down if the maximum value should be exceeded, lighting the indicator on the dashboard panel.

An appropriate “Reset” pushbutton allows the vehicle to be moved out of the dangerous area in case of temperature and (versions for Zones 1 and 21 only) earth leakage sensor’s alarms intervention.

ELECTRICAL EQUIPMENT AND SYSTEM

The electric wiring system has armoured cables for ducts subject to movement or without any mechanical protection.

Light blue wires are used for the connections of components with built-in protection, and their relative cable

glands (certified for their respective categories). The system is fitted with a 2-pole emergency battery cut-off switch.

BATTERIES AND CONNECTORS

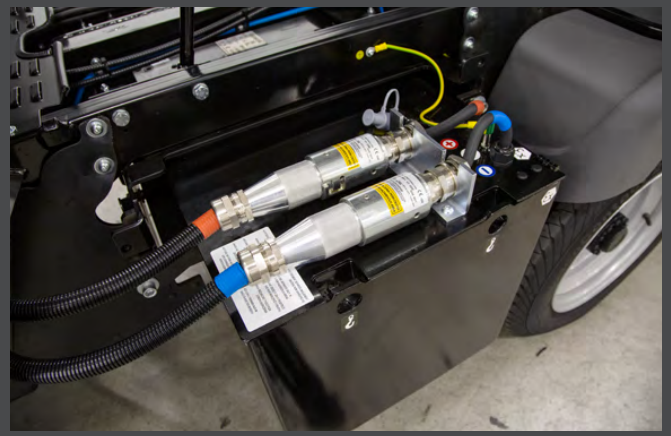
The **ALKE'** ATXEX versions for Zones 1 and 21 has as vehicle battery type the Ex-e filling system.

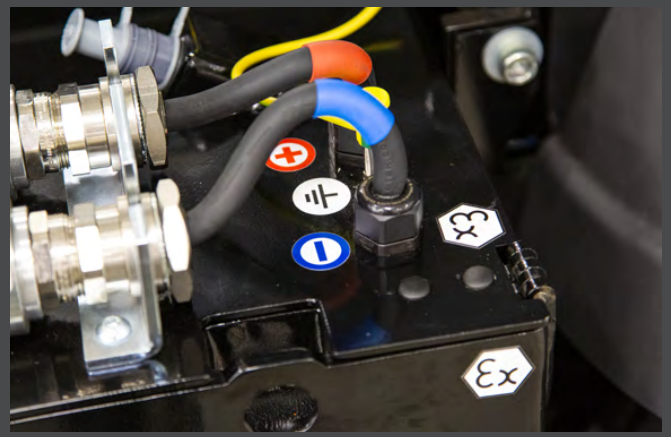
Battery connectors are Ex-d type certified. On the versions for Zones 2 and 22 the batteries and relative connectors respect the EN 60079-15 standard.

NON ELECTRIC PARTS

The disk or drum brakes are equipped with wear and temperature sensors to avoid the formation of sparks caused by the friction between metals, and to prevent friction overtemperatures from exceeding the value of the required temperature class and limit.

The seats of versions for Zones 1 and 21 are covered with an antistatic material and, where necessary, the external plastic surfaces are treated with electroconductive paint. All tyres are electro-conductive. Accessories, such as flashing beacon, reversing beeper, headlights, etc. are explosion-proof.





CERTIFICATIONS AVAILABLE

for EUROPE, ASIA, MIDDLE EAST
in conformity with ATEX 2014/34/EU
3G IIB T3 · 3D IIB T3
2G IIB T3 · 2D IIB T3
M2 T150°C

for NORTH AMERICA

in conformity with UL 583, Directive NEC 505
Class I Division 2
Class II Division 2
Class I Division 1
Class II Division 1

for AUSTRALIA

2G IIB T3 in conformity with ATEX 2014/34/EU delivered with CAD certificate for each vehicle plus an overall specific ATEX certificate

ATXEX RANGE

TECHNICAL DATA

The **ALKE' ATX EX** electric utility vehicles are available with 2 or 4 seats cab and a cargo bed with the possibility of customised variants upon request.

note **Top speed:** approximate, obtained on a flat surface in optimum usage conditions and in SPORT mode. **Maximum negotiable slope:** approximate and assessed with vehicle empty in ideal usage conditions on discontinuous ramps. **Maximum autonomy:** the max autonomy value reported is indicative and refers to homologation data collected on WLTP cycle basis (combined circuit) with an configuration Alke' ATX vehicle with basic flatbed configuration. **Estimated battery lifespan:** approximate figure, based on the information in the manufacturer's possession at the time this file was published. **Maximum towing capacity:** calculated in optimum usage conditions, the trailers must have repulsion brakes and comply with the law. Maximum vertical weight on the tow hitch: 120kg. **The technical specifications indicated in this catalogue** (performance, autonomy, dimensions, etc.) depend - or may depend - on temperature, terrain, driving style, accessories, load or use of the vehicle. The data usually refers to use on a flat surface in optimum usage conditions - i.e. a basic vehicle version with no load and with the lightest battery, on an even and paved road surface with an outdoor temperature of 25°C, the battery fully charged, on board electronic devices switched off, and without any other accessory consumption. **The technical specifications,** design and performance levels indicated in this technical data sheet are by way of example only and may be subject to modifications without prior notice.

· as standard Δ optional — not compatible

ELECTRIC VEHICLES

With more than 25 years of experience and thousands of vehicles on the market, **ALKE'** is a key player in the electric road and industrial vehicle industry at an international level. Its products are positioned at the high end of the market in terms of quality and performance and are now sold in more than 40 countries around the world covering all continents. Amongst its customers, **ALKE'** is proud to be able to include big names in the industry, important organisations and exclusive locations.
